## **Dam Incident Twain Harte, Tuolumne County (Update)**

At approximately 1015 hours, 08/03/14, the Twain Harte Lakes Association, reported a Dam Incident at Twain Harte Dam, Tuolumne County, to the California State Warning Center.

- There remains no imminent threat as a result of the incident.
- The Flash Flood Warning previously in effect has been cancelled by the National Weather Service.
- There are multiple cracks above the water line; below the water line where the dam interfaces with a boulder is where the leak is occurring.
- The flow from the crack is approximately 100 gallons per minute (gpm)
- As a precautionary measure, approximately 2,000 gpm was being released to lower the level of the Twain Harte Lake below the damaged area on the dam. According to the Department of Water Resources (DWR), Division of Safety of Dams (DSOD) that flow rate has been increased.
- It was originally estimated that it would take two days to lower the level of the lake approximately 10 feet; due to increased release rate, that estimate has been revised to 24 hours.
- DSOD is closely monitoring the situation and will notify FOC if situation worsens.
- The current situation is a hazardous situation developing with NO imminent threat of failure.
- [See Northern California Significant Activity Section for detailed information.](#)

## Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

Increasing moisture and instability will generate showers and thunderstorms across the interior today and Tuesday. A return to more seasonal conditions is expected later in the week. Meanwhile, the coast should anticipate overnight low clouds and fog with temperatures remaining near normal.

#### **San Francisco Weather:**

Showers and thunderstorms will be possible tonight through tomorrow afternoon due to an increase in subtropical moisture, mainly from the San Francisco Bay area north. Temperatures and weather will become more seasonable by the second half of the week.

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY**

#### **Sacramento Weather:**

Today and Tuesday, the forecast area will have scattered to numerous showers and a few thunderstorms over the mountains with a slight chance of showers and thunderstorms for the valley. The clouds and showers will moderate temperatures for the next couple days, then the region will get warmer starting around midweek.

#### **Hanford Weather:**

A weak upper level low pressure system centered near Yosemite will bring scattered showers and isolated thunderstorms to the Southern Sierra through this evening with residual cloudiness over the foothills and lower elevations from Fresno County north. The low will meander over northern California through Tuesday then settle southward near the central California coast during midweek. The proximity of this system may produce isolated showers or thunderstorms along the Sierra Crest Tuesday and Wednesday.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

Scattered showers and a slight chance of thunderstorms will continue through the evening for portions of Ventura and Los Angeles Counties. The atmosphere is expected to dry out overnight into Monday. Overnight low clouds and fog will return to the coastal areas early in the week. Temperatures will return to near normal by midweek.

#### **Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

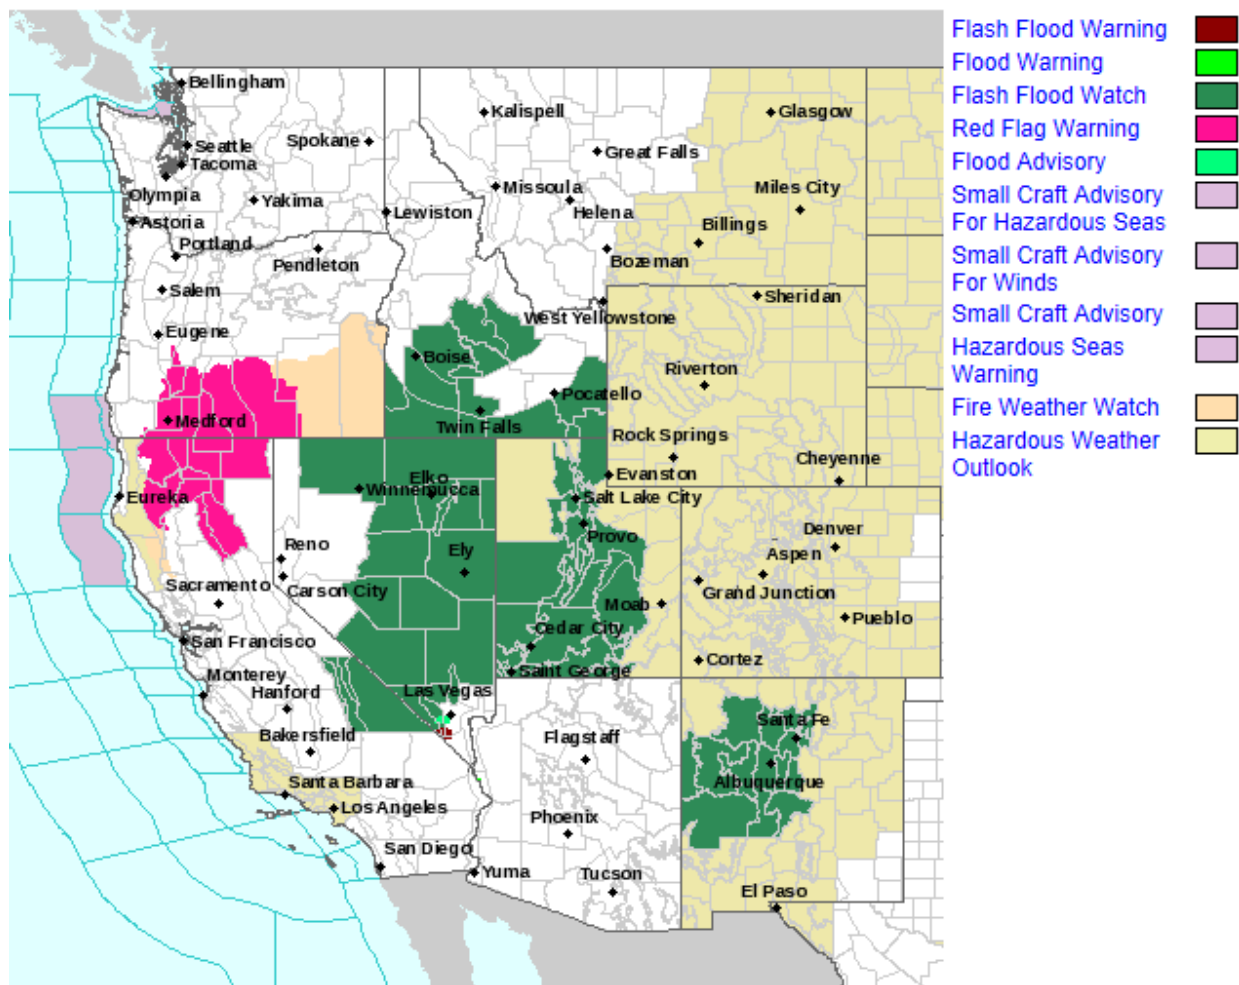

A weak trough of low pressure off California will move slowly toward the coast through Thursday bringing drier southwest flow aloft beginning today. The marine layer, with areas of night and morning coastal low clouds and fog, will return tonight and deepen slightly into Thursday. Coastal temperatures will slowly cool through Thursday with inland temperatures slowly warming but remaining a little below average. For Friday through early next week, high pressure to the east will strengthen and expand westward bringing a warming trend with a return of monsoonal moisture Sunday and Monday.

#### **Southeast California Weather:**

A strong upper low will exit the region by tonight but lingering moisture will still provide chances for late morning and afternoon showers and thunderstorms across the higher terrain east of Phoenix. A significant drying trend will overspread the forecast area beginning tonight essentially cutting off any storm chances for Tuesday through Thursday. A gradual return of storm chances from east to west is then expected to begin by the end of the week, likely continuing into the upcoming weekend.

# **FIRE ACTIVITY**

## **Oregon Gulch, Vegetation Fire, Siskiyou County Cont. (Update)**

### **Critical Infrastructure (including Hospital and Medical Facilities)**

- The fire is threatening Fall Creek which is the source of the City of Yreka's water supply. Cal Fire has this as a significant infrastructure item for their planning purposes.
- City of Yreka has a contingency plan in place. There is a generator on site, with a second one available if needed. The City can also pump from wells if necessary.
- Cal Fire has prepped the area around the water intake station to assist with defense.

### **Utilities**

- The fire is threatening 60 kV, 115 kV, and 230 kV power lines.
- According to CUEA representative, there is a PG&E substation that is threatened. Currently firefighters have a line around the substation which they feel will minimize the threat. PG&E technicians have checked the natural gas lines and they are deemed safe. As a contingency they have a low-boy generator that is located in Shasta County.
- PG&E Emergency Management is actively monitoring the situation throughout all of Northern California.
- Klamath River Hydro Project: Cal ISO tested the system and confirmed it had not lost capacity, and is stable. The lines are currently parallel to the fire, unaffected and operating normally. PG&E grid contingency plan is an alternate routing capability as is Cal ISO's contingency plan. If the system were to go off-line, there would be no impact to the grid. It is a small satellite generating station of 2.75 megawatts, which is tied to an auxiliary 60 KV system used as backup generation only to lower costs. It is a low-voltage, private plant under contract with PG&E.

## **Dam Incident Twain Harte, Tuolumne County (Update)**

At approximately 1015 hours, 08/03/14, the Twain Harte Lakes Association, reported a Dam Incident at Twain Harte Dam, Tuolumne County, to the California State Warning Center.

- There remains no imminent threat as a result of the incident.
- The Flash Flood Warning previously in effect has been cancelled by the National Weather Service.
- There are multiple cracks above the water line; below the water line where the dam interfaces with a boulder is where the leak is occurring.
- The flow from the crack is approximately 100 gallons per minute (gpm)
- As a precautionary measure, approximately 2,000 gpm was being released to lower the level of the Twain Harte Lake below the damaged area on the dam. According to the Department of Water Resources (DWR), Division of Safety of Dams (DSOD) that flow rate has been increased.
- It was originally estimated that it would take two days to lower the level of the lake approximately 10 feet; due to increased release rate, that estimate has been revised to 24 hours.
- DSOD is closely monitoring the situation and will notify FOC if situation worsens.
- The current situation is a hazardous situation developing with NO imminent threat of failure.

### **Drinking Water Impact:**

According to Tuolumne CAO and Deputy CAO (OES), draining water from Twain Harte Lake will not affect the community's water supply.

- Twain Harte Lake is described as a recreational lake and is not a source of drinking water. Total amount of water is approximately 142 acre feet (AF) with an estimated depth of 25 feet.
- Water being released will travel down to the Phoenix Lake Reservoir which is part of the TUD water system. Out-flow from Phoenix Lake will be adjusted to negate increased in-flow so Phoenix Lake level will remain static. Excess water will continue to travel to Lake Don Pedro which is not part of the community water system.

## **Dam Incident Twain Harte, Tuolumne County Cont. (Update)**

### **Planning:**

Total number of residences that would be affected by an evacuation should dam failure become a concern is being assessed by the Sheriff's Office. Three communities would be affected: Crystal Falls Subdivision, Sonora Meadows and Phoenix Lake Country Club

- If an evacuation was necessary, the county would utilize the Emergency Notification System (ENS) to communicate instructions to residences between Twain Harte Lake and Lake Don Pedro.
- As of 1515 hours on 08/03/14, the County had issued a press release and was drafting a message instructing residents to be prepared for evacuation.

### **Utilities**

- CUEA advised PG&E is working directly with Tuolumne Sheriff's Office on the Twain Harte Dam; risk is very limited to transmission towers.

### **Deployments:**

- There are currently (2) engineers and (1) engineering geologist on-site from DSOD; they plan to stay until the situation is stable.
- A Cal OES Inland Region ESC is being deployed on 8/4/14.

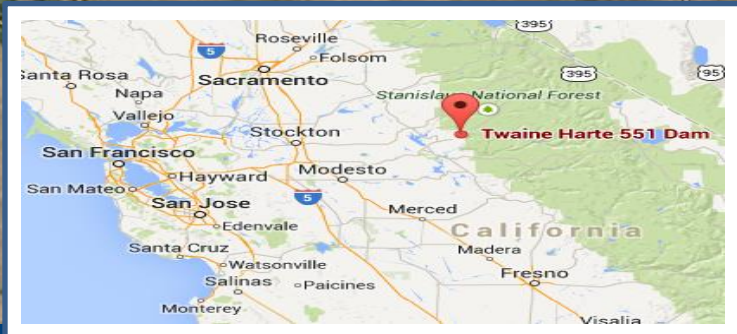

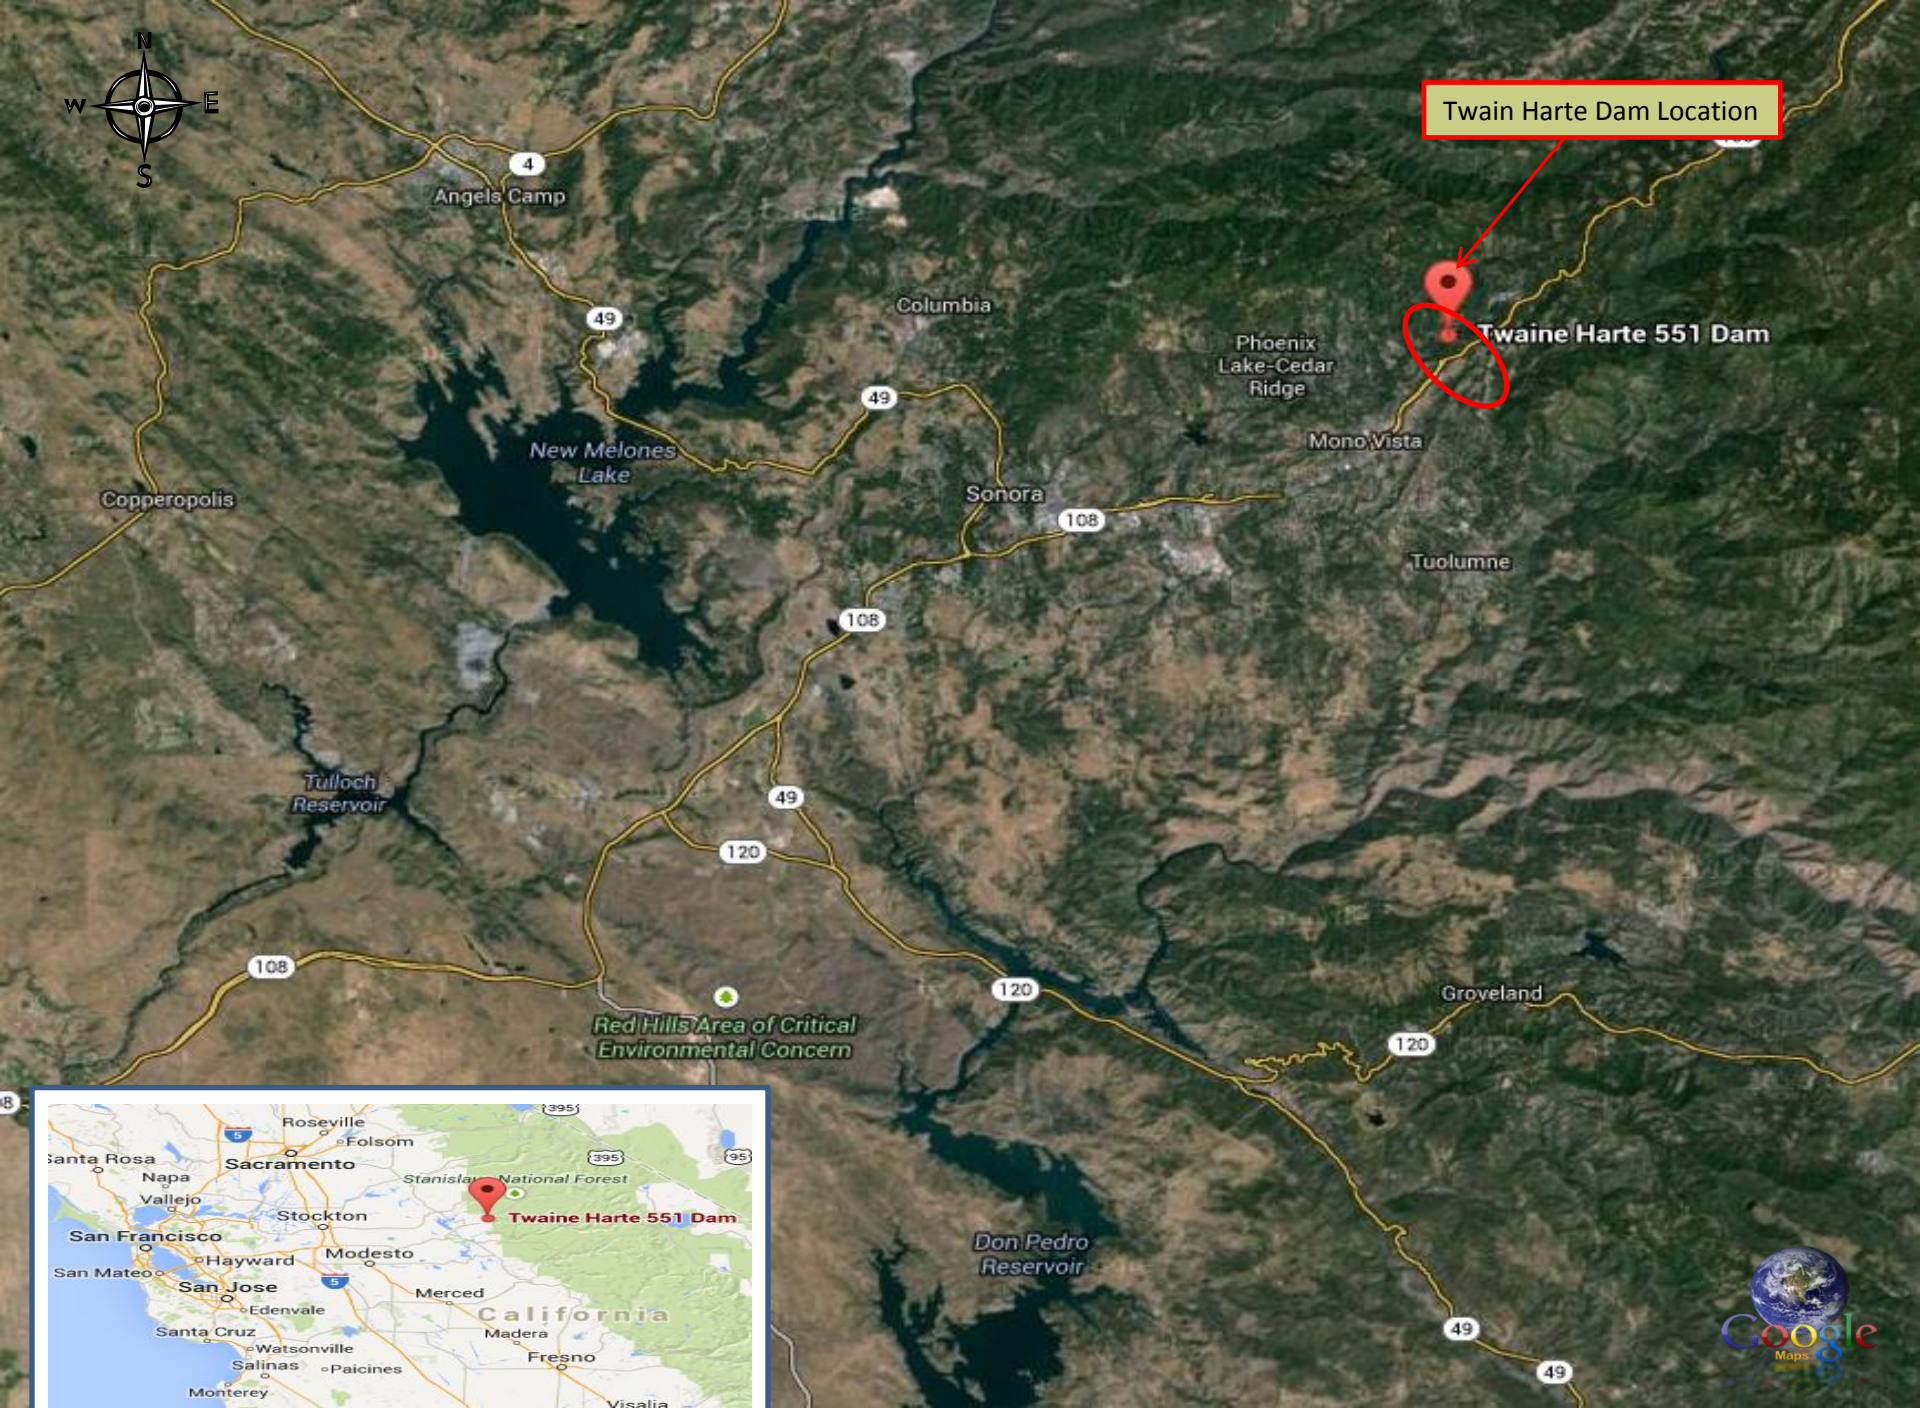

### **Current Agencies on Scene:**

- Division of Safety of Dams (DSOD) from the Department of Water Resources (DWR)
- Tuolumne Utilities District (TUD)
- Twain Harte Community Services District
- PG&E
- Tuolumne County Sheriff's Office

Cal OES Inland REOC and the State Operations Center continue to monitor the incident.

There are currently no unmet needs.

## **Cal EOC Incident – 2014 Drought**

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

## **Situational Summary**

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- On 7/15/14 the State Water Resources Control Board passed a new emergency regulation to reduce outdoor urban water use. The regulation makes an exception for health and safety circumstances. Local agencies can ask courts to fine water users up to \$500.00 a day and the SWRCB can fine water agencies up to \$10,000.00 per day. The adopted regulations are expected to go into effect by August 1, 2014 and remain in effect for 270 days.

- Current Reservoir Levels continue to decline. Pine Flat had a 5% decrease from last week. Levels as of July 30: Don Pedro 44%; Exchequer 21%; Folsom Lake 42%; Lake Oroville 36%; Millerton Lake 53%; New Melones 26%; Pine Flat 14%; San Luis 23%; Lake Shasta 35%; Trinity Lake 36%; Pyramid Lake 93%; and Castaic Lake 47%.

### Situational Summary

- **Drought Top Environmental Concern of Californians, PPIC Report Finds:** A newly released survey by the Public Policy Institute of California (PPIC) reveals that drought and wildfires are at the top of the list of public worries about the impacts of global warming. The survey also found that 75% of respondents believe public water agencies should require residents to reduce water use.

- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
- The DWR has released a list of unmonitored high and medium priority groundwater basins. As outlined in California's Water Code, some counties and groundwater management agencies in unmonitored basins may be ineligible for water grants and loans administered by the state.
